

 VOLKSBANK

Inspiration.

An extraordinary creation is the result of inspiration, passion and style.

We understand banking as part of a cultured lifestyle.

After our first meeting itself, you will give up some conventional ideas of a bank for portfolio management. Volksbank AG stands for modern and dynamic banking. Our business is often equated with rationality and strategic calculation. These requirements are important for comprehensive counselling. Nevertheless, we think that banking should be part of a cultured lifestyle.

Regard us as your personal investment designer. We live the inspiration and the creativity, in order to create, from a variety of products, an attractive investment outfit, which is perfectly tailor-made for you. Therefore experience us in analogy with the world of textile and fashion and experience our services in the truest sense of the word. With inspiration, passion and style.

Only if the best and most beautiful materials are matched with each other harmoniously, works of art emerge, which find a place in memory.

We have direct access to all products world wide.

With the principle of open architecture a boundless spectrum of financial products is at our disposal. We therefore act independently and impartially in every regard. We have only one objective: To adapt solutions to your personality, your situation in life, your expectations and your dreams. Dynamically, as is your life. We work for that with dedication and professional skill.

Harmony.

Creativeness.

Perfect design requires
knowledge, creativity and
inspiration.

We see ourselves as your personal investment designer.

Personal counselling presupposes that your current situation in life and your future intentions are examined thoroughly. After a careful analysis we create a comprehensive investment concept for you. Objective of our holistic advice is a strategy adapted harmoniously to all your assets. We have developed Compass Counselling, awarded with «summa cum laude» by Elite Report, especially for this, and we thus belong to the leading service providers in the German-speaking area. Our offer of services extends from depository management through consultancy and administration mandate right up to Family Office.

Personality is the perfect interplay of visual, professional, emotional and social competences.

We create the perfect asset outfit tailor-made for you.

Clothed suitably and attractively, you can feel calm and self-assured. Even when it concerns your assets. We are responsible for it remaining so. We check constantly whether your life and assets situation has changed. If necessary, we point out possible corrections to you.

With the high quality and security, which we can ensure as an independent partner of the Volksbank group within an international network of business relationships, you are selecting a professional and reliable partner.

Personality.

Style.

Find your personal style, which makes you unique and genuine. For style is a way of life and not simply a contemporary style.

A visit to the bank should be a positive experience, which remains permanently in memory.

If a dress sits perfectly and attracts many compliments, one would not like to take it off at all. Our relationship with you should develop in the same manner. For, sustainability brings confidence and understanding. With us everything is oriented towards that. Our colleagues are constantly focussed on creating individual solutions around you. Behind this there is a wide international network.

But whoever wants to speak must also be able to listen. Therefore, above all, we would like to give you time for meetings. We look forward to meeting you.
